

Object-Oriented Concepts in Distributed Systems

Contents

A	Organizational Topics	A.1
A.1	Lecture	A.1
A.2	Exercise classes	A.5
B	Overview	B.1
B.1	Object-Oriented Programming	B.1
B.2	Distributed Systems	B.2
B.3	Programming Distributed Systems with CORBA	B.3
B.4	Java — OO Language + Virtual Machine for Objects	B.4
B.5	Frameworks	B.5
B.6	Research on Distributed Object-Oriented Systems	B.5

C.7	Basic Concepts of the OO Paradigm	C.36
1	Abstraction	C.37
2	Encapsulation	C.38
3	Abstract Data Type	C.39
4	Modularity	C.42
5	Hierarchy	C.43
6	Typing	C.44
7	Type Hierarchy	C.45
8	Polymorphism	C.46
9	Polymorphism in C++	C.47
10	Types & C++ — Abstract Classes	C.53
11	Types & Java — Abstract Classes	C.54
12	Types & Java — Interfaces	C.55
13	Genericity	C.57
14	Genericity & C++: Templates	C.58
15	Concurrency	C.60
16	Concurrency & Java	C.61
17	Persistence	C.63
C.8	OOA & OOD	C.66
1	Overview	C.66
2	OOAD Methods	C.67
3	OOA — Process	C.68
4	OOD	C.69
5	UML Notation(1): Class Diagrams	C.70
6	UML-Notation(2): Collaboration Diagrams	C.71
7	Design Patterns	C.72

C	Object-oriented Programming	C.1
C.1	Overview	C.1
C.2	References	C.2
C.3	Motivation for the OO Paradigm	C.4
1	Goals	C.4
C.4	Software-Design Methods	C.6
1	Classification [Boo94]	C.6
2	Top-Down Structured Design (Composite Design)	C.7
3	Data-driven Design	C.9
4	Object-oriented Design	C.10
C.5	The Evolution of the Object Model	C.13
1	Generations of Programming Languages	C.13
C.6	Object-oriented Programming	C.15
1	Definition (Grady Booch)	C.15
2	Basic Terms	C.16
3	Objects & Methods	C.17
4	Classes	C.18
5	Objects and Classes in C++	C.19
6	Methods in C++	C.20
7	Instantiation in C++	C.21
8	Objects and Classes in Java	C.24
9	Inheritance	C.25
10	Inheritance in C++	C.31
11	Dynamic Binding	C.34

D	Distributed Systems	D.1
D.1	Definition and Motivation	D.1
1	Motivation	D.2
2	Advantages	D.4
3	Disadvantages	D.6
D.2	Taxonomy	D.8
1	Multiprocessors	D.10
2	Multicomputers	D.12
3	Network Operating Systems	D.14
4	True Distributed Systems	D.16
D.3	Communication Models	D.17
1	Protocol layers according to the ISO OSI reference model	D.17
2	Classification	D.20
3	Rendezvous Model	D.22
4	Synchronous Request-Reply Model	D.23
5	Asynchronous Request-Reply Model	D.24
6	Reliability	D.25
7	Remote Procedure Calls	D.32
8	Name Server and Binding	D.37
9	Group Communication	D.38
